## BALWAN

Advantages of Balwan :

● Increases in area of elemental update due to deep penetration of primary, secondary and root hair. ● Porous soli for good root aeration due to the development of mycohorrizal fungi and also water holding capability of s Un-Interrupted transportation of water and absorted elements to the apex of the plant to increase the rate of photosynthesis . ● Expansion in leaf area to increase the rate of photosynthesis and to increase the production of carbohydrates. ● Non Cragulation of proteins due to uninterrupted absorption of water and transportation to crops. ● Presence of leal nitrogen more than 55% and carbon than 18% to control the vegetative growth and to increase reproduction. ● Protein degradation will be, delayed due to presence of carbon, Hydrogen, Oxygen, Nitrogen and Sulphur without any interpation. ● Un-interrupted catalytic action of enzymes for the formation of Hormones.● Un-interrupted production of carbohydrates to increase energy levels for respiration and other physiological active. ● Low rate of Uniformity in fruit or bolles till the end of the crop transpiration during drought spell. ● Delay in eaf sanescence due to continuous supply of root derived cytoki.

Direction of Use :

● Recommended Crops : Paddy, Sugarcane, Grapes, Banana, Potato, Onion, Chilli, Turmeric, Flowers, Vegetables Dota, Cotte, Cardamom, Pulses and other Fruits Crops.
● Doses : Follar Spray 2.5-3 ml per Litre of water, For Drip Irrigation: 3 to 5. Litre per acre depending op on stage of the Crops.
● Precautions : Keep away from Children.
● Storage Conditions : Store at room temperature.

| Composition : Organically Derived | | |
|---|---|---|
| Amino Acid | : | 20.00% |
| Organic Matter | : | 49.00% |
| Aqueous Media | : | 31.00% |
| Total | : | 100.00% |

## NUTROLDF

Method Of Use:

● Nutrol DF is to be dissolved in water, perferably soft water & given via drip application or spray. ● If Nutrol DF to be applied via drip application, apply it at rate of 1ml. of water flow. ● If Nutrol DF to be applied via foliar application dissolve 2 ml. to 3 ml. of Nutrol DF per water & Spray (Soln.is 0.3%) ● Spray the above solution to leaves. Take care that all Sides of leaves are completed covered with spray. ● Spray during cooler part that is early morning or in evening times of the day. ● Nutrol DF can be mixed with almost all spray fertilizers. ● For Optimum results better not to mix Nutrol DF with other Pesticides-insecticides.

Time For Application

● Minimum give three application of Nutrol DF. ● First application or spray to be given 20 to 25 days after germination or transplanting. ● Secpmd application or spray to be given just before on set of flowering period. ● Third application or spray to be given at fruit development or fruit maturity period.

For All Vegetables, Fruits & Other Crops like Tomatoes, Capsicum, Grapes, Pomergranate, Sugarcane Cotton, Wheat, Paddy, Oilseeds, Flowers etc.

| Composition -(w/w) | | |
|---|---|---|
| Zn- 3% | Cu-1% | Fe-2.5% |
| Mn-1% | B-0.5% | Mo-0.1% |

## PRO-96

**Advantages of Pro-96 :**

● Pro-96: This is a non-toxic product developed through research and introduced for the first time in India. ● Pro-96 contains highly active phosphorus, produced using modern technology, and is supplemented with active potash. ● Pro-96: Increases the resistance power of the plants to withstand the stress caused by climate change and floods. The plants become strong, efficient and healthy. ● Pro-96: It is inter-flow. Pro-96 is environmentally friendly. Pro-96 is residue free. Products like Pro-96 are used abroad for the production of export quality grapes. ● Regular use of Pro-96 increases the immunity of the orchards and thus reduces the incidence of disease in Pro-96 orchards. ● The use of Pro-96 effectively prevents diseases like downy mildew, downy mildew, brown rot, root rot, fruit rot, plover draping, scab, black rot, pueraria, pythium, phytophthora, etc. and rejuvenates diseased orchards and makes them disease-free quickly. ● Pro-96 Resistance to any disease-causing bacteria or virus never develops.

**Pro-96 spraying rate and method :**

● The first spray of Pro-96 should be given at 4 grams per liter of water and subsequent sprays should be given at 2 to 3 grams per liter of water. ● If the weather is cloudy and there is a high chance of downy mildew, spray Pro-96 at the rate of 4 grams per liter of water. ● Pro-96 penetrates the leaves within half an hour and does not wash away even if there is any rain. After 4 hours, you can spray another spray as per your schedule. As soon as the weather improves, spray Pro-96 as usual. ● While preparing the solution of Pro-96, do not mix any chemicals like spreaders, stickers, wetting agents, organic chemicals, citric acid or anything else in it. ● Pro-96 No. Prepare a solution of Pro-96 in plain water and spray. ● Pro-96 should be used at a rate of 5 to 7 kg per acre during the season. The pH of Pro-96 in pure water is between 6 and 7. Therefore, there is no scorching on the orchards. If Pro-96 is used at the flowering stage, flower dropping stops. Pro-96 never stains the grapes. Pro-96 increases the quality of the grapes in terms of size, color, sweetness, etc. and gives a kind of freshness and shine to the fruits. It improves the storage quality of grapes.

## TEJ

**Advantages of Tej :**

● TEZ is the best bio Stimulant. ● TEZ is a unique product of natural origin having multiple activities as a plant bio-stimulant, an anti-stress agent. ● Nutrient equillibration, an enhancer in the use of micro and micro elements and as an indirect improver of activity of some enzymatic reactions to bring about a tremandous boost in quality and quantity of the product.

**Composition :**

| | | |
|---|---|---|
| Organic Fraction derived from D. Amino E. H., bio enzyme | : | 60% |
| Associated manufacturing derivatives aqueous diluent | : | QS |
| Total | : | 100% |

## ZOOM

Advantages of ZOOM :

- Zooom-is Eco-friendly bio-stimulent is recommended for all types of crops, vegetables and fruit.
- It is specially recommended for grapes, pomegranates, chillies. It divides active cells.
- Zooom is water soluble and non toxic plants, animals and humans.
- Zooom does not leave any residues, keep in cool and dry place.

Use : Zoom is uses 1 ml per lit of water in dipping.
100 ml. of Zoom in 100 lit. of water for spray.

Contains :

| | | |
|---|---|---|
| L-Cystaline Derivative of Amion Acid | : | 10% |
| Folic Acid | : | 02% |
| Aqua | : | 88% |
| Total | : | 100% |

## ACTIVA

Advantages of Tej :

- Activa is an effective amino acid that is useful for the growth of all types of vegetable and fruit crops.

Contains :

| | | |
|---|---|---|
| Amino Acids (16 Types) | : | 9000 P.P.M. |
| Nicptinic Acid | : | 20% |
| Folic | : | 2500 P.P.M. |
| Vit. B1, B2, B6 - | : | 500 P.P.M. |
| Dissolving Agent - | : | Rest |

## CALCINATE

● Seaweed Extract Based Biostimulant is a natural plant growth enhancer derived from selected marine algae. Rich in bioactive compounds, it improves crop vigor, stimulates growth, and enhances resistance to stress. It contains organic matter, amino acids, carbohydrates, vitamins, and natural plant growth regulators that promote healthier and more productive crops.

Benefits :

- Enhances seed germination and early seedling growth.
- Promotes vigorous root development for better nutrient and water uptake.
- Stimulates flowening, fruit setting, and fruit development.
- Improves crop tolerance against drought, salinity, heat, and pest/disease stress
- Increases yield, quality, and shelf life of harvested produce.

Application :

- Foliar Spray : 2.0-3.0 ml per liter of water.
- Drip Irrigation/Soil Application : 500-1000 mL per acre, depending on crop and growth stage.

| Containng: | |
|---|---|
| Total Organic matter 17 % w/w which is composed of Sugar alcohols, amino acids, organic acids,carboydrates, vitamins and anti-oxidants | 20%W/V |

## BORONATE

● Seaweed Extract Based Biostimulant is a natural plant growth enhancer derived from selected marine algae. Rich in bioactive compounds, it improves crop vigor, stimulates growth, and enhances resistance to stress. It contains organic matter, amino acids, carbohydrates, vitamins, and natural plant growth regulators that promote healthier and more productive traps.

Benefits :

- Enhances seed germination and early seedling growth.
- Promotes vigorous root development for better nutrient and water uptake.
- Stimulates flowering, fruit setting, and fruit development.
- Improves crop tolerance against drought, salinity, heat, and pest/disease stress.
- Increases yield, quality, and shelf life of harvested produce.

Application :

- Foliar Spray : 2.0-3.0 ml per liter of water.
- Drip Irrigation/Soil Application : 500-1000 ml per acre, depending on crop and growth stage.

| Containng: | |
|---|---|
| Total Organic matter 17 % w/w which is composed of Sugar alcohols, amino acids, organic acids,carboydrates, vitamins and anti-oxidants | 17%W/V |

## ZINCONATE

● Zinc Oxide Suspension Concentrate is a highly concentrated, flowable liquid formularior containing 39.5% elemental Zinc (Zn). It is designed for quick correction and prevention of zinc deficiency in crops.

Benefits :

● Corrects hidden and visible zinc deficiency symptoms (stunted growth, yellowing,poor grain filling.)
● Enhances photosynthesis and protein synthesis.
● Promotes better flowering, fruiting and yield.
● Suitable for use in all crops (cereals, pulses oilseeds, fruits vegetables, sugarcane,cotton etc.)

Application :

● Foliar Spray : 200-300 ml per acre diluted in 200 liters of water (depending on crop stage.)
● Soil Application/Fertigation : 1-2 liters per acre, depending on soil zinc status and crop. requirements.

| Containng : | |
|---|---|
| Dense suspension concentrate of liquid | 39.5% min |
| Zinc (as Zn) per cent by weight | |
| pH (5% Solution) | 9.0 ± 1 |

## JR KELP GREEN

● JR KELP GREEN is an organic product prepared from natural stress resistant Kelp species. ● It increases the crop abiotic stress resistant power. ● It increases crop health and soil health by promoting photosynthesis promoting greater root growth. ● JR KELP GREEN is clear green colored solution which contain seaweed extracted by cold extraction process. ● Due ot cold extraction process it contains high amount of auxins and cytokinin. ● The good ration of Auxins and Cytokinin enhance the root and shoot development. ● Natural occuring Cytokinines promotes the uniform bud bursting ● It also helps in cell division and cell elongation.

Application :

● Drip : 2 Litre per acro for drip.
● Spray : 1.5 to 2 ml per litre fo water for spraying.

Compaibility :

● Can be used with all kinds of Agro Chemicals.

| Composition : | | |
|---|---|---|
| Kelp (Ecklonia Maxima) extract | : | 20% |
| Proteins | : | 10% |
| D.M. Aqua | : | Q.S. |
| Total | : | 100% |

## ROYAL

● Royal Grapes is Eco-friedly bio-stimulent is recommends for all type of all crops, vegetables & fruit. It is specially recommended for grapes, pomegranates, chillies. It divides active cells. Royal Grapes is water soluble & non toxic plants, animals & humans. Royal Grapes does not leave any residues. keep in cool & dry place.

Application :

● Royal Grapes is uses in spray 1 ml. per lit. of water.

● In dipping 100 ml. Royal Grapes 100 lit. of water.

Warranty :

Since the use of products is beyond our control, we can not assure any responsibility other uniform quality of the product. The result of this product depended on climate condition.

| Containng : | | |
|---|---|---|
| Protein Hydrolized | : | 0.04% |
| Ascophyllum Nodulus | : | 10% |
| Carboxylic Acid | : | 5% |
| Vitamins B1 B2 B6 B12 | : | 2500ppm |
| Total | : | 100% |

## 5STAR

● 5-STAR is a product based on plant extracts, vitamins, auxins, and cytokinins and is made from completely natural ingredients. ● The use of 5-STAR increases the size, color, sugar content, weight, and quality of grapes, pomegranates, and all other fruits and vegetables. ● The use of 5-STAR reduces waterberry mummification and pinkberry in grape crops. The grapes become hard and the stalks are strong. ● This reduces the amount of grapes falling out of the bunch during harvesting and prevents the grapes from cracking. ● The use of 5-STAR significantly increases the number of flowers in pomegranate crops, reduces flower and fruit set, and reduces cracking of the fruit skin, making the pomegranate seeds harder and darker in color.

Application :

● Use 5 to 10 ml of 5-STAR for 1 Plant of Grapes or other fruits and vegetables.

● Use only for drip application.

● Shake well before use.

| Composition : | | |
|---|---|---|
| Mineral Mixture | : | 20% |
| Alginic acid | : | 13% |
| $K_2O$ | : | 10% |
| Other | : | 57% |
| Total | : | 100% |

JR Agro Chemicals

*Success Your Dream With Us.....*

## MILTON

- MILTON is made from natural ingredients and is effective against mealybugs and aphids. It is completely natural.

Application :

- 2 to 3 ml per ltr. of water for Spraying.

Please check the agrochemicals compatibility before use :

- MILTON is prepared by natural occurring medicinal plants oil and extract.
- MILTON is 100% Eco-Friendly Organic product
- It can be used up to Harvesting
- It's Primary work on the white protective layer of mealybug

| Composition : | | |
|---|---|---|
| Ginger Extract | : | 02.0% |
| Plant Extract | : | 10.0% |
| Non ionic surfactant | : | 10.0% |
| Filler oil and Extract | : | Q.S. |
| Total | : | 100% |

Manufactured & Marketed by :
